leading ^{THROUGH} dedication

Synmac more than one decade has proven to be a reliable partner in the field of water treatment and has since grown and diversified into a leading global supplier of speciality additives and chemicals. Synmac speciality chemicals division delivers integrated solutions, innovative processes and chemical products. Synmac is part of a network with manufacturing facilities and offices in the Asia Pacific, Africa, the Middle East and Europe. Synmac benefit in three ways -

- Through our commitment to innovation
- Through our applications development expertise and knowledge of the market
- Through our "best buy strategy" which we employ to ensure you get the best possible product for your money

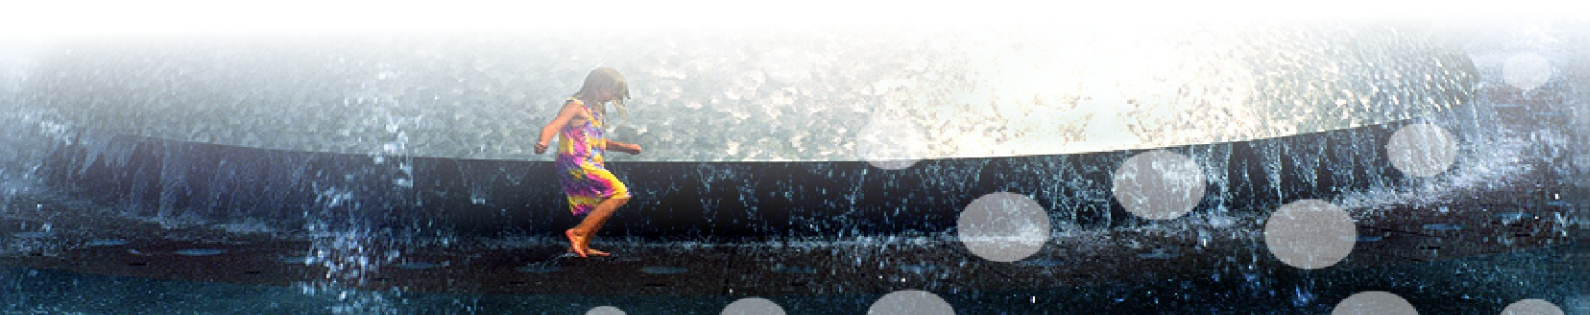

leading^{THROUGH}values

At Synmac, we believe in values such as quality, reliability, creativity and commitment. Values that are inherent in our company's culture and form the essence of our vision and mission. Values that steer all our effort to deliver good products and services.

We are committed to ensuring our manufacturing process has little or no impact on the environment, integrating OHSAS into our safety guidelines. For our employees long-term well-being, we provide the best professional opportunities within a challenging yet nurturing workplace.

leading^{THROUGH}technology

As a technology leader, Synmac delivers state-of-the-art manufacturing processes, and services. We know technology is fundamental to maximizing the value of our customers' businesses as well as our own and so are fully committed to maintaining world-class personnel and research facilities. With our constant quest for excellence, technology, whether acquired outside the company or developed within, plays a crucial role in propelling us beyond the competition.

THROUGH leading innovation

We are continuously exploring the latest technologies both in sugar process and industrial water treatment chemicals and looking to build strategic alliances with Synmac rations to develop efficient and cost effective products. With a knowledge base stretching back over many years, Synmac is able to draw on valuable expertise and resources from our global operations to deliver quality products and solutions to our customers. Our commitment to them is further strengthened with unfailing support from our people and our facilities to provide our customers with innovative solutions.

We have a major force in developing and promoting non-toxic, environment-friendly micro-biocides and water soluble polymers for use in various industry. These alternatives provides our customers with similar levels of performance compared to the traditional systems.

THROUGH leading quality

Synmac is reconised as leading producer of speciality chemicals of sugar and water treatment. We export to many customers in the ethanol, distillery, paper, textile, leather, pharmaceuticals, rubber, cement, construction and coating industries around the world.

We operations have garnered ISO 9001 certification and OHSAS guidlines into our existing ISO 14001 manufacturing locations to streamline our production process while reducing the impact our operations have on the environment.
